ACKNOWLEDGEMENT

Words are insufficient to express my deep gratitude to my guide and supervisor, Dr. Martin Reymend Encily, Associate Professor, Department of Zoology, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad. Formerly at Department of Zoology, Ahmednagar College, Ahmednagar. I am grateful to him for his valuable suggestions, constructive criticism, wholehearted cooperation, encouragement and above all for his insistence for perfection and a quest for knowledge. I am surely inspired by his undaunted dedication, breathtaking commitment and demand for excellence, which gave me the courage to focus on result, to put in strenuous work by delving deeper into the subject matter, in spite of the struggles, challenges and hardships during this research work and to present this Thesis.

I express my gratitude to Dr. R. J. Barnabas, Principal, Ahmednagar College, Ahmednagar, for making the laboratory and other infrastructure available to me in the course of my research work. I remember with gratitude the former Principal Dr. A.G. Bansode who assisted me in the selection of my Guide, and for his constant support at the time of my registration.

My sincere thanks are due to Rev. Dr. John Prabhakar, Head, Department of Zoology, Ahmednagar College, Ahmednagar for providing the necessary facilities. I am thankful also to the former Head, Dr. R.D. Francis, Dr. Arif Shaikh, D.G. Bhalsingh, the other faculty members, and the lab assistants, Mr. R. Tushar, Mr. B.T. Salve and Mr. S. Suyog of the Department.

I would like to thank the authorities of Dr. B. A. Marathwada University for permitting me to avail of the facilities of the Hostel and of references to write the Thesis. Also I thank Dr. K.B Shejule, Associate Professor of the Department of Zoology for helping in the preparation of the slides and photography and Dr. Satish Patil, Associate Professor, Department of Environmental Science, for providing me the laboratory and use of internet facilities during the writing of the thesis.

A sincere appreciation to Mr. B.S. Dhokane the photo artist, Botany Department, Dr. B. A. Marathwada University, Aurangabad and the research students Mr. Siddarth Pagare, Mrs. Swapnaja Mahajan and Miss. Sheelu Kharat for all the help.
rendered at the time of thesis writing. I would also like to thank, The Zoological Survey of India, Pune, for the identification of the crab samples.

In a very special way I owe my thanks to my Congregation, The Ursuline Sisters of Mary Immaculate (UMI), for providing me the precious privilege of doing my doctoral studies. I remember with gratitude my Provincial, Sr. Berchmans, for the encouragement and support rendered to me in the completion of this endeavor. In a particular way, I express my thanks to the members of my religious community at St. Mary’s Convent, Newasa, for their support, cooperation and understanding. Dear sisters you have stood by me all through. Moreover, for releasing me time and again from my duties of the school to complete this research work. I extend my sincere thanks to St. Mary’s School staff. I also remember with gratitude my friends and well wishers, who stood by me all along this important journey. A word of special thanks to the Social Centre at Ahmednagar, Fr. Jerome and community, and Fr. Emmanuel and community at Francilian Technical Institute, Aurangabad. I would also like to thank my brothers and sisters for their concern, thoughtfulness, and encouragement.

The love and affection of my late Mother has been my life’s inspiration and she is my model. She taught me never to give up when involved in the pursuit of a worthy cause. Her belief and faith in me gave me the necessary courage and energy to pursue my goal. Moreover, she is my source of strength and support, by way of her prayers and constant concern. I dedicate this work to her with love and affection.

Date: 25-3-10

Sr. Corte Rosaria Joaquim
